This book provides three perspectives on the geological column: 1) it is a record of Flood burial, 2) it should be thrown out, and 3) the intermediate position, my position, that the geological column represents a general order of Flood burial with exceptions. Each presenter also had to defend his view from the other presenters.

15) Oard, M.J., 2011. *Dinosaur Challenges and Mysteries: How the Genesis Flood Makes Sense of Dinosaur Evidence—Including Tracks, Nests, Eggs, and Scavenged Bonebeds*. Creation Book Publishers, Powder Springs, GA.

Besides delving into challenges to the conventional view of dinosaurs, it explains the most serious dinosaur challenge for the dinosaurs dying in Noah’s Flood. This is the challenge of how to explain millions of dinosaur tracks, millions of dinosaur eggs, and scavenged bonebeds early in the Flood. They can be explained by the BEDS model. BEDS stands for Briefly Exposed Diluvial Sediments.

This is a long dissertation on the abundant evidence for runoff of Noah’s Flood with color figures. These features are difficult, if not impossible for uniformitarian scientists to explain. It provides powerful evidence for the reality of Noah’s Flood.

19) Oard, M.J., (ebook), 2014. *The Genesis Flood and Floating Log Mats: Solving Geological Riddles*, Creation Book Publishers, Powder Springs, GA.

Eight challenging riddles for the Flood can be explained by aspects of floating vegetation/log mats during and after Noah's Flood. These riddles include polystrate trees, the Yellowstone fossil "forests", coal, amber and insects in amber, and post-Flood biogeography.

This book goes through the strata in the walls of the Grand Canyon and the origin of the canyon. It goes through the many problems for conventional scientists and the dam-breach theory for explaining the Grand Canyon. It finishes with an explanation of how the canyon was formed by Late Flood channelized erosion.

Major DVDs

1) Oard, M.J., 2011. *The Great Global Warming Debate*, Creation Book Publishers, Powder Springs, GA.

This DVD goes through the observed data on climate change and shows that man and nature both have caused global warming. The climate models that project the temperature change out into the future are exaggerated. And since we need more unbiased research and have time, we do not have to act now to "save the planet", destroying the economies of the world.

2) Oard, M.J., 2013. *The Great Ice Age: Evidence from the Flood for Its Quick Formation and Melting*, (97 minutes), Awesome Science Media, Amherst, VA.

This is more than a talking head. It shows me out in the field pointing out and explaining numerous Ice Age features and how they were formed as a result of the post-Flood rapid Ice Age caused by Noah's Flood. It is

3) Oard, M.J., 2014. *The Great Missoula Flood: Modern Day Evidence for the Worldwide Flood*, (82 minutes), Awesome Science Media, Amherst, VA.

This also in not just a talking head. It shows me out in the field pointing out some of the hundreds of evidences for glacial Lake Missoula and the ensuing flood. It also points out features formed in this flood that are analogs for similar features produce by the runoff of Noah's Flood.

4) Oard, M.J., 2017. *The Receding Floodwaters: Incredible Geologic Evidence for the Worldwide Flood*, (89 minutes), Awesome Science Media, Amherst, VA.

This shows the tremendous field evidence from the northwest states for the runoff of Noah's Flood. Many of these features from the field of geomorphology are difficult, if not impossible, for conventional scientists to explain by uniformitarianism and deep time.
